

MODEL: Blower Exhaust Extension
PART #: 725-041

Tempest Technology Corporation, Inc. has developed the NEW NON-LEAK exhaust extension for Gasoline Powered Blowers. Made of tough, corrugated rubber, the 10' X 2" exhaust extension will not rust and easily stores in small spaces. Heat dissipates quicker, preventing burning of floors and painted surfaces. The attachment end is reinforced with three feet of flexible stainless steel hose, preventing pinching and providing free-flowing exhaust.

Up to two (2) sections of the 10' X 2" exhaust extensions can be connected together for a total length of 20'.

All Tempest Power Blowers manufactured after July 1, 1999 are equipped with the 2" diameter deflector pipe attached to the muffler, EXCEPT FOR THE DIRECT-DRIVE 16". The DD-16 blowers require special modifications to attach the 10' X 2" exhaust extension. After modifications have been applied, the muffler extension protrudes 3 (three) inches beyond the edge of the frame.

All Tempest blowers manufactured after September 1, 1993 and prior to July 1, 1999 are equipped with mufflers having a one inch deflector pipe and accept the 8' X 1" exhaust extension (PART # 725-003).

RETROFIT INFORMATION

A. UNIVERSAL MUFFLER ADAPTER – PART # 725-044 . The universal muffler adapter attaches to the one-inch deflector pipe with thumb screws, expanding to a 2" diameter pipe that accepts the 10' X 2" exhaust extension.

4708 N. Blythe Ave., Fresno, CA 93722

B. MUFFLER ASSEMBLY – PART # 600-032 PRICE \$297.00. Earlier models of Tempest blowers with Tecumseh engines had mufflers with a circular pattern of exhaust holes (no deflector pipe) prior to September 1, 1993. The muffler needs to be replaced with a muffler assembly, which has the one-inch deflector pipe.

C. MUFFLER DEFLECTOR (EXTENSION) – PART # Determined by engine make and model number. Muffler deflectors (extensions) can be attached to the muffler housing on Tempest blowers with Briggs and Honda gasoline engines manufactured prior to September 1, 1993.

EXHAUST EXTENSION QUICK REFERENCE GUIDE

Tempest blowers manufactured:

After July 1, 1999 – Part # 725-041

Between September 1, 1993 – July 1, 1999, UNIVERSAL MUFFLER ADAPTER required (see “A” above)

Before September 1, 1993 – Specific information required, such as:

Blower Model:

Example BD21-T-5.5 or TGB214

Blower Serial #:

Example 0393-1234. The first four numbers indicate a manufacture date of March 1993.

Make of gasoline engine:

Briggs & Stratton or Honda: MUFFLER DEFLECTOR (see “C” above)

Tecumseh: MUFFLER ASSEMBLY (see “B” above)
