

VentMaster™

# 375K Cutoff Saw

The 375K Cutoff Saw incorporates features found on no other Cut Off Saw on the market today. This lightweight unit provides for maximum Power, Versatility and Durability.

**Stability.  
Easy Starting.  
Versatility.**

## Smoother Operation, Reduced Wear

The 375K features the most advanced air intake filtration and cooling system available today. The patented "Centrifugal Force" Active Filtration System mechanically filters 97% of airborne contaminants, preventing premature clogging. The cleaning system allows for longer intervals between filter cleanings and provides for smoother operation and reduced wear.

## Fast, Easy Starting

The unique Decompression valve reduces piston pressure during starting. The valve reduces required pulling force therefore making starting easier and reducing wear on starter parts. The large D-Ring Starter Handle and One Step Starting make the 375K faster and easier than the competition.

## Versatility for Tough Cutting Jobs

The high-power and wide torque enables this saw to work with large diameter cutting discs for greater cutting depths. The reversible cutting arm allows for cutting in close, confined spaces. With its slim saw body and high center of gravity the 375K is handy and easy in tough situations and harsh environments.

|                          |                                     |
|--------------------------|-------------------------------------|
| Cylinder Volume:         | 74.7 cm <sup>3</sup> / 4.6 cu. inch |
| Power:                   | 75cc / 3.7 kW / 5.0 hp              |
| Fuel tank capacity:      | 0.77l / 1.63 US pint                |
| Disc sizes:              | 350 mm / 14"                        |
| Max periphery speed:     | 100 m/s                             |
| Sound level:             | 102 dB                              |
| Noise emissions, LWA:    | 116 dB(A)                           |
| Vibrations front handle: | 2.7 m/s <sup>2</sup>                |
| Vibrations rear handle:  | 4.6 m/s <sup>2</sup>                |
| Weight:                  | 9.7 kg / 21.4 lbs                   |
| Water Kit Included       |                                     |
| Blade Not Included       |                                     |

## 3120K Cutoff Saw

This 120cc saw is one of the most powerful handheld power cutters. The 3120K has a rugged and powerful engine that can handle deep cutting applications with blade diameters up to 16".

Blade Not Included

Husqvarna Power Head

## Saw Blades

### The Multi-Cut Carbide Segmented Blade

A 14" carbide blade designed for use in a multitude of applications including, roofing, drywall, sheet metal, auto bodies and much more. Blade can be reversed for extended life.

### Abrasive Blades (not shown)

Made of high quality abrasive materials that provide an excellent combination of cutting speed and wear resistance. Available for materials such as metal, concrete, aluminum and ductile iron.

## 385K Cutoff Saw

This 81cc saw features a 1.5" diameter by 7" wide saw support roller attached underneath the engine head to support the weight and provide for more stable operation during long trench cuts. More powerful, the 385K can handle longer stroke cuts under full load better than most 95cc cut off saws. **Blade Not Included**

EFCO Power Head

VentMaster™

# KIS-360

## Adjustable Depth Gauge

### Control The Depth Of Cut

The KIS-360 is the newest addition to the VentMaster line of innovative cutting tools for fire/rescue and industrial ventilation. The KIS-360 adjustable depth gauge allows precise control of the cutting depth with no saw blade overlap. Simply adjust the depth gauge, start the saw, and cut. The KIS-360 is only available from Tempest.

- Designed to enhance control of the saw during long trench or concrete cuts
- Allows the operator to control the depth of the cut from 0" up to 6"
- Can be installed on a variety of 12" and 14" cutoff saws
- Depth gauge arm can be quickly removed in seconds
- All aluminum construction guarantees light weight and durability
- KIS-360 upgrade kit includes all hardware and templates for quick mounting to a variety of saws

### Engineered To Be Installed On The Following Cutoff Saws
