

VentMaster Cutoff Saws_0108 Maintenance Routines

To optimize the life and reliability of your stone cutter, it's important to service it regularly. Here are a few points that will help you bring order to your product service.

- Daily routines
- Weekly routines
- Monthly routines

DAILY ROUTINES

Check that throttle components work correctly from a safety view point (throttle and starter throttle catch).

Clean the pre-filter.

Check the tension of the drive belt.

Check the condition of the cutting blade.

Check the condition of the blade guard.

Check the starter and the starter cord; clean the outside of the starter's air intake.

Check that all nuts and bolts are tightened correctly.

Check that the short-circuiting contact functions.

WEEKLY ROUTINES

Check the main filter.

Check that the handles and anti-vibration elements are not damaged.

Clean the spark plug. Check that the electrode gap is 0.5 mm (0.020").

Clean the cooling fins on the flywheel. Check the starter and recoil spring.

Clean the cooling fins on the cylinder.

Clean the carburetor.

MONTHLY ROUTINES

Check the clutch drum, drive-pulley and clutch springs with regard to wear.

Clean the outside of the carburetor.

Check the fuel filter, fuel hose; change if necessary.

Clean the inside of the fuel tank.

Check all cables and connections.
