

VentMaster™

KIS-360 Adjustable Depth Gauge

Control the Depth of Cut

The KIS-360 is the newest addition to the VentMaster line of innovative cutting tools for fire and rescue ventilation. The KIS-360 adjustable depth gauge allows for precise control of the cutting depth with no saw blade overlap. Simply adjust the depth gauge, start the saw and cut. The KIS-360 is only available from Tempest.

- Designed to enhance control of the saw during long trench or concrete cuts.
- Allows the operator to control the depth of cut from 0" to 6".
- Can be installed on a variety of 12" and 14" cutoff saws.
- Depth gauge arm can be quickly removed in seconds.
- All aluminum construction guarantees light weight and durability.
- KIS-360 upgrade kit includes all hardware and templates for quick mounting to a variety of saws.
